

Vaishnavi Arruru

B.Tech Civil Engineering

ce23btech11058@iith.ac.in

+918125634408

Degree	University/Institute	Year	CGPA/Marks(%)
B.Tech Civil Engineering	IIT Hyderabad	2027	7.36
XII (Board of Intermediate telangana)	SriChaitanya Junior College	2023	98.20%
X (BSE Telangana)	SriChaitanya High school	2021	10.00

SKILLS

- Languages:** C++, C, Python, HTML, SQL, LaTeX
- Tech&Tools:** APIs(FastAPI), OOP, LangGraph, LangChain, Solid Edge, Postman
- DBMS:** SQL (PostgreSQL, MySQL)
- DevOps& OS:** Docker, Git, Hugging Face, Windows, Linux
- Soft Skills:** Communication, Problem-Solving, Adaptivity, Agile

SCHOLASTIC ACHIEVEMENTS

- Secured **top 9%** in **JEE Advanced** Jun'23
- Secured **98** percentile in **JEE MAINS** Jan'23
- Placed **top 0.9%** in Mathematics, Physics and Chemistry in **Telangana state EAMCET** May'23
- Selected** in **National Talent Search Examination** Level-1 conducted by **NCERT** '21
- Ranked **16th** in 50th National Mathematics Talent Contest(NMTC) among the top scorers in **Sub-Junior Level** final '18
- test held by Associates of Mathematics Teachers of India (**AMTI**)

POSITIONS OF RESPONSIBILITY

- Manager** and **Assistant Manager** in **E-cell IITH** Ideation domain Aug'23-May'25
- Buddie** in **Sunshine**-The Counselling Cell IITH Aug'23-Apr'24
- Core** in **Media council** IITH(multimedia) May'24-Apr'25
- Core** in **Gesture** (art club IITH) May'24-Apr'25
- Core** in **Behind the lens** (Film making club IITH) May'24-Apr'25
- Coordinator** in **INTER IIT Sports Meet** (Events) Jun'25-

PROJECTS

- Task Management System**
 - 1) Built a **full-featured Task Management System** in Python using **FastAPI** for **RESTful APIs** with **PostgreSQL**, supporting pagination, filtering, and structured API responses.
 - 2) **Integrated Pydantic models** and type hints for **input validation**, **API schema generation**, and **robust error handling**.
 - 3) **Containerized PostgreSQL** using **Docker** and ensured modular, scalable service design principles for future extensibility.
- Drowsiness Detection System**
 - 1)Developed a **real-time drowsiness detection** model using a **Convolutional Neural Network (CNN)** trained on a large **Kaggle dataset** of eye images.
 - 2)Classified eye states (open/closed) with **high accuracy** to monitor patterns and detect signs of fatigue.
 - 3)Enabled **real-time alerts** by integrating continuous eye behavior analysis, forming the core of a practical **sleepiness monitoring system**.
- Crypto Live Dashboard**
 - 1)Built a **full-stack web app** that collects real-time crypto token data from **multiple APIs** and displays it in an interactive dashboard.
 - 2)Created a **Node.js/TypeScript backend** with **WebSocket** updates to show live changes in price, volume, and trends.
 - 3)Developed a responsive **React frontend** with **filtering**, **sorting**, and **pagination** to let users easily browse and track live token data

RELEVANT COURSES

- Introduction to Programming by Professor Vineeth N Balasubramanian and Mourendra
- Introduction to SQL with MySQL- Udemy
- Data Structures and Algorithms

EXTRACURRICULAR

- Participated in **Solo dance** competition during **Diesta** fest Jan'25
- Participated in **Carrom** competitions and **Cricket** championship(runnerups) during **Diesta** fest Jan'25
- Participated in **Singing** during Civil Departmental day Apr'25
